

Name: J A Mujeeb

Student Reference Number: 10707284

Module Code: ISAD253SL	Module Name: ISAD253SL Databases (20/AU/M)
Coursework Title: ISAD253SL C1 P1	
Deadline Date: 04/01/2021	Member of staff responsible for coursework: Naji Saravanabavan
Programme: BSc (Hons) Software Engineering (4872)	
Please note that University Academic Regulations are available under Rules and Regulations on the University website www.plymouth.ac.uk/studenthandbook .	
Group work: please list all names of all participants formally associated with this work and state whether the work was undertaken alone or as part of a team. Please note you may be required to identify individual responsibility for component parts.	
<p>S O Perera – 10707315 G M D D Rathnayake – 10707351 S S N S Nevins – 10707291 W N D Perera - 10707045 S P Ratnayake – 10707051</p>	
<p>We confirm that we have read and understood the Plymouth University regulations relating to Assessment Offences and that we are aware of the possible penalties for any breach of these regulations. We confirm that this is the independent work of the group.</p> <p style="text-align: center;"></p> <p>Signed on behalf of the group:</p>	
<p>Individual assignment: I confirm that I have read and understood the Plymouth University regulations relating to Assessment Offences and that I am aware of the possible penalties for any breach of these regulations. I confirm that this is my own independent work.</p> <p>Signed :</p>	
<p>Use of translation software: failure to declare that translation software or a similar writing aid has been used will be treated as an assessment offence.</p> <p>I *have used/not used translation software.</p> <p>If used, please state name of software – SQL Server Management Studio</p>	
<p>Overall mark _____ % Assessors Initials _____ Date: 04/01/2021 _____</p>

FIGURE 3: NORMALIZATION DIAGRAM

Data Dictionary

Library

P/F	Field Name	Description	Data Type	Field Size
P	L_no	Each library has a unique number E.g., Main Library = 01	Integer	2
	Name	Name of each library	Text	15
	Location	Location of each library and it is multi-valued attribute	Text	20

TABLE 1: LIBRARY

Copy

P/F	Field Name	Description	Data Type	Field Size
P	C_no	Each copy has a unique number	Integer	5
F	ISBN_no	Each book has a unique number	Integer	5
	C_price	Price of each copy	Varchar	

	C_location	Location of each copy	Text	20
--	------------	-----------------------	------	----

TABLE 2: COPY

Book

P/F	Field Name	Description	Data Type	Field Size
P	ISBN_no	Each book has a unique number	Integer	5
F	Pub_ID	Each publisher has a unique ID	Integer	3
	B_name	Name of each book	Text	20
	Author	Author of each book	Text	15
	B_price	Price of each book		
	Title	Title of each book	Text	15
	Availability	Whether the book is available or not	Text	10

TABLE 3: BOOK

Member

P/F	Field Name	Description	Data Type	Field Size
P	ID code	Unique number for each member	Auto number	05
	M_name	Name of each member	Text	20
	M_age	Age of each member	Integer	02
	M_gender	Gender of each member (Male/Female)	Text	05
	M_contactno	Contact number of each member	Integer	10
	M_address	Address of each member	Varchar	20
	Memb_date	Start date of membership		
	Exp_date	Expiry date of membership		
	NIC	National Identity Card number of each member	Integer	10

TABLE 4: MEMBER

Employee

P/F	Field Name	Description	Data Type	Field Size
P	E_ID	Unique ID number for each Employee	Auto Number	05
	E_Name	Name of each Employee	Text	20
	E_age	Age of each Employee	Integer	02
	E_address	Address of each Employee	Varchar	20
	E_gender	Gender of each Employee (Male/Female)	Text	05
	E_Contactno	Contact number of each Employee	Integer	10
	Salary	Salary of each Employee	Float	07
	Qualification	Qualifications of each Employee, this can be multi-valued	Text	30

TABLE 5: EMPLOYEE

Section 02

Creating Table

1. Library

```
USE [LibrarySYS]

FIGURE 47: 2ND PROCEDURE

Section 04

Worthy features

A worthy feature in our Library Service System is that we have broken down members into further categories like kindergarten kids, undergraduates, postgraduates, students, etc. this makes it easier for the member during application.

Together with any shortcomings

There were many issues with how to do the tables and how to do them properly and there were some issues with the triggers.

How they might be resolved

We watched and researched in many websites and YouTube, and then we made many mistakes but, in the end, we got it right

Future Implementation

Sri Lankan public libraries still track books by hand, where they use a card system. This can be exhausting and slow. These libraries can benefit from this application if they implement it. They will save time, increase efficiency, and have less paperwork.
